

Reverse list with k group

k = 2

$p_0 = 2$ false

Answer looks like

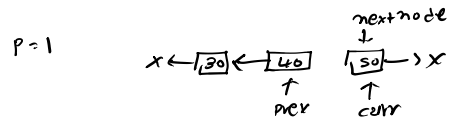

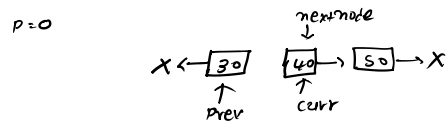

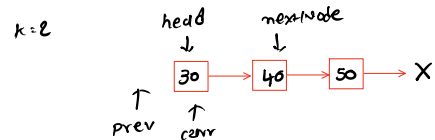

$20 \rightarrow 10 \rightarrow 40 \rightarrow 30 \rightarrow 50$

Diagram showing the recursive call and return:

```

graph LR
    head --> 10
    10 --> 20
    20 --> 30
    30 --> 40
    40 --> 50
    50 --> X
    prev --> 40
    curr --> 50
    nextnode --> X
    
```

Annotations: $(nextnode != null)$ True, $prev \hookrightarrow 40 \rightarrow 30 \rightarrow 50 \rightarrow X$, $head \rightarrow next = RECALL(nextnode, k);$

$p=2$ X
